

# FLEXO & ROTOGRAVURE INKS

## TECHNICAL DATA SHEET

Series name: ROTOFLEX

ROTOFLEX are flexo & rotogravure printing inks to be applied on different substrates.

#### **Substrates**

Polypropylene films

Polyethylene films - high and low density

Aluminum foils

Metallize films

**Papers** 

Cellophane and polyester

#### **Characteristics**

Type: liquid

Viscosity: 40 -60 according to cup F4 at 25C°

D.R. (dry residue): 30-50% Specific weight: 1 to 1.25g/cm<sup>3</sup>

### **Technical Properties**

High concentration and efficiency

Very good fitness to printing on surface and reverse sides

High brightness

High thermal resistance (thermowelding)

Good adhesion

Quick drying

Good scratch and rub resistance

Good light fastness

All raw materials are F.D.A approved and suitable for food packaging

### **Dilution**

1- Flexo: mixtures of ethyl alcohol 99% and ethyl acetate 80/20%

2- Roto: 100% Ethyl acetate

Retarder: - Cellosolve (Ethyl glycol)

-1-methoxy-2-propanol ( Dowanol PM )

Our technical laboratories are at your complete disposal to carry out further checks on whatever substrate, for better security.
